**Post-Storm Electric Distribution System Damage Inspection**

To Whom It May Concern:

The Long Island Power Authority ("LIPA") would like to let you know that as a result of this past week's storm, LIPA will need to conduct a comprehensive inspection of our distribution electrical systems. The objective is to identify conditions that occurred during the storm that did not cause an outage however, if left unattended may result in an outage or present a safety hazard to the community. This work is scheduled for tomorrow Tuesday, June 29 at 7 am till dark – rain or shine. If necessary, system inspection activities will continue on Wednesday.

These activities will require our personnel to assemble at the electric substations. In the surrounding communities field personnel will be driving their personnel vehicles with a magnetic "Emergency LIPA Damage Survey" sign on the door. The personnel that exit vehicles to investigate system conditions will have LIPA or National Grid hardhats along with ID badges and safety vests.

In some areas our personnel will access back yards of homes and rear lots of businesses; this is required to conduct a full and complete survey of the system. LIPA workers will make every effort to contact these customers as they perform their duties.

We anticipate that some members of the community may view the increased activities and contact Police Departments or local governmental agencies. These efforts are needed to ensure the safety of the public and integrity of the LIPA electrical distribution system.

Thank you again for your cooperation.

Please direct any customer inquiries regarding LIPA to 1-800-490-0075. If government officials have any questions or require further information regarding the above, please do not hesitate to call Matt Cohen at (516) 719-9842 or his cell phone at (516) 443-9847.

Sincerely,

Michael Hervey  
SVP of Operations, Long Island Power Authority
